

23RD AOTEAROA NEW ZEALAND SCOUT JAMBOREE 2023-24

JAMBOREE ALERT

At the Jamboree, all Troop Leaders will be provided with a mobile phone to assist with Jamboree-related activities on site.

An iPhone SE or a variation mobile phone will be connected to a WiFi-only network at the Jamboree site. Please note that the mobile phones will have no access to calls or texts and roaming data.

The phone will be available for collection each morning from The Hub and returned to The Hub for charging in the evenings.

Each phone will be used for:

- To report incidents via Vault to allow the reporting of any incidents and near misses.
- To connect, as another tool, to Mahi Tahī to log achievements and participation. Youth will also be able to do this at The Hub.

Youth Experience Review

The mobile phones' primary purpose will be to record a site-wide feedback review each evening. Feedback gathered will provide the Jamboree Leadership Team with vital information to help with future planning and implementation of activities on each day.

The feedback will be recorded via a Google form pinned to the phone and completed daily **between 4:30 pm and 7:00 pm.**

23RD AOTEAROA NEW ZEALAND SCOUT JAMBOREE 2023-24

There will be two feedback question streams. The first stream completed by Patrols(Teams) will focus on activities achieved that day. The second stream, conducted as a collective Jamboree Troop, will seek more general feedback.

The two streams of feedback will provide the Jamboree Leadership Team with a more transparent and accurate picture of how the Jamboree is achieving its educational outcomes and a pulse of how things are going from a participant's viewpoint.

It will be essential to return the phones to The Hub each evening to have the next day's Google form loaded into the device.
